### TECHNICAL DATA SHEET

**PRODUCT NAME:**

**LIFT STATION CLEANER**

**CODE: 7831**

**DESCRIPTION:**

**LIFT STATION CLEANER** is a liquid treatment and odour control for grease traps, drains, sumps, garbage and sewage areas. A concentrated, heavy-duty solvent degreaser, it has no chlorinated solvents. Non-acid, non-caustic and non-corrosive.

**LIFT STATION CLEANER** dissolves the toughest build-ups quickly and remains in lift station as floating degreaser on water for extended degreaser action.

FEATURES	BENEFITS
Positive deodorizing action	Subtle, citrus aroma – Pleasant to use
	Provides broadest range of cleaning performance against a larger number of soils
Non-corrosive	Can be used on plastic, fiberglass, copper and steel

**DIRECTIONS:** As a floating degreaser in a lift station, add 2 litres of cleaner for each square foot of water surface and continue adding until a layer of 8 to 12 inches is floating on the surface. This will form a layer of cleaner that will strip grease off the walls of the lift station as the water level rises and falls. At this usage rate, it will also dissolve floating grease balls and accumulations from pumping equipment. This initial treatment should remain effective for a period of three to six months depending upon system demands.

**SPECIFICATIONS:**

**Appearance:** Dark Brown viscous  
**Odour:** Citrus  
**PH:** Neutral  
**Total Activity:** 100.00
