TECHNICAL DATA SHEET

PRODUCT NAME:

SUPER ALUMINUM & STAINLESS STEEL CLEANER

CODE: 7856

DESCRIPTION:

SUPER ALUMINUM & STAINLESS STEEL CLEANER is an acid based detergent cleaner used for pressure cleaning all types of stainless steel tanks and trailers. It brightens and renews both aluminum and stainless steel surfaces. **SUPER ALUMINUM & STAINLESS STEEL CLEANER** easily removes oxides soot and soil and it contains no harmful alkalis or abrasives. **SUPER ALUMINUM & STAINLESS STEEL CLEANER** will not corrode aluminum surfaces, cleans quickly without scrubbing. **SUPER ALUMINUM & STAINLESS STEEL CLEANER** will also remove road film and diesel smoke.

DIRECTIONS:

SUPER ALUMINUM & STAINLESS STEEL CLEANER may be used either hot or cold; hot water will make the solution more aggressive and greatly increase the cleaning power. **For users with little or no experience with the product, cold water is recommended.** Apply through a high-pressure sprayer or with a brush, **do not** use synthetic bristles. Also, the trailer body should be cool.

For heavy-duty use: Dilute 1 part product to 10 parts water.

For light soil: Dilute 1 part product up to 25 parts water.

The diluted solution is sprayed on drenching foam top to bottom of trailer or tank. In approximately 3 to 5 minutes, before the foam begins to gel and streak, rinse with clean generous amounts of water from top to bottom. This will leave a clean, bright, shiny surface.

NOTE: If product is allowed to remain on surface too long, aluminum has a tendency to turn white. Use ample water when rinsing. Product may etch glass, especially when allowed to dry on surfaces. For industrial and institutional use only.
